

## **Taylor Howard**

*Technical Manager*

Tribridge IT

As a technical manager at Tribridge, Taylor specializes in identifying, architecting, and implementing Business Intelligence and SharePoint knowledge solutions that allow an organization to gain tangible return on investment (ROI) by providing historical, current, and predictive views of business operations leveraging data visualization technologies.

He also has experience in the enterprise architect role developing global technology solutions. These deployments employ SOA design patterns across heterogeneous environments integrating .NET and Java technologies while adhering to enterprise security best practices. Additionally, he takes great pride in training and providing governance policies that ensure a successful long-term solution well after a client engagement has completed.

Taylor is an accomplished architect and developer that provides clients with solutions incorporating market, financial, and resource drivers that complement their corporate strategy roadmap.

Before being employed by Tribridge, Taylor worked at First Advantage and In.vision Research.

He has worked for both startups and large business solutions corporations in the pharmaceutical, employer services, document management and financial services segments.

Taylor holds a Microsoft SharePoint 2010 IT Professional certification. He is a graduate of Eckerd College with a major in computer science.
